

# East-Asia Earthquake Seminar 2012

International Collaboration and Regional Capacity Building for the Forecast, Preparedness and Early Warning of Earthquake, Tsunami and Volcano in Northeast Asia

October 29-31 2012, Seogwipo  
Organized by  
Korea Meteorological Administration  
China Earthquake Administration  
Japan Meteorological Agency  
first circular and registration

KMA hosts East-Asia earthquake seminar 2012 this fall at JeJu islands, Korea. The scope of the meeting mainly confined to the scientific issues related with induced disasters from Earthquake, Tsunami, and Volcano.

The Seminar mainly invites researchers, scientists and policy-making-related experts in China, Japan, and Korea. Distinguished guests join to give special lectures on various topics. 2<sup>nd</sup> annual meeting of the strategic Korea-Japan-China cooperative program also act as a part of the seminar to strengthen this meeting.

This seminar focuses to promote cooperation and coordination among three countries. Besides the scientific and technical exchanges and policy-making-related discussion, the outcome of the Seminar will be utilized to facilitate disaster preparedness actions in the countries.

Funding is available based on application.
