## Final Presentation held on August 5<sup>th</sup> and 6<sup>th</sup>

By Dr. Tatsuya Azuhata, Director of IISEE

We held the final presentation on the individual study for the 2020-2021 regular course over two days from August 5. The final presentation was held jointly by the three courses of Seismology, Earthquake Engineering, and Tsunami Disaster Prevention.

Fifteen trainees from ten countries participated in the 2020-2021 course. Due to the COVID-19 pandemic, the course started remotely, and 12 trainees came to Japan from the middle. Three trainees could not come to Japan until the end of the period and stayed in their home countries to do their master's thesis research. The final presentation was a hybrid of face-to-face and online, and the trainees who could not come to Japan gave their presentations from their home countries. All 15 trainees attended the final presentation and presented the results of their master's thesis research. I am pleased that all the trainees completed their master's thesis despite today's difficult circumstances. Some supervisors for their master's thesis research attended the final presentation online. I want to express my gratitude to all of them.

Mr. ROSID Abdul from the Indonesia, Seismology Course

Mr. DEY Bidhan Chandra from Bangladesh, Earthquake Engineering Course

## Call for Papers

IISEE Bulletin is now accepting submissions of papers for the seismology, earthquake engineering, and tsunami. Developing countries are targeted, but are not limited.

Your original papers will be reviewed by the editorial members and some experts.

NO submission fee is needed.

Try to challenge!!

## Contact Us

The IISEE Newsletter is intended to act as a go-between for IISEE and ex-participants.

We encourage you to contribute a report and an article to this newsletter. Please let us know your current activities in your countries.

We also welcome your co-workers and friends to register our mailing list.

Ms. SINKI Kian Purna from the Indonesia, Tsunami Disaster Mitigation Course

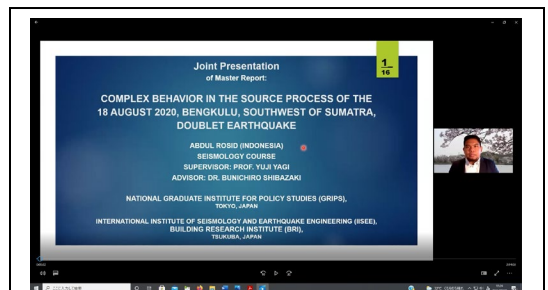

Mr. BHATTARAI Yadav Lal from Bhutan, Earthquake Engineering Course

## IISEE/ICAHM Collaborative Research Presentation held on August 26<sup>th</sup>

By Dr. Tatsuya Azuhata, Director of IISEE

The training program by ICAHRM (International Center for Water Hazard and Risk Management) at the PWRI is certificated as the Master's program of the National Graduate Institute for Policy Studies (GRIPS) like the IISEE's training program. Like IISEE, ICAHRM trainees are lodging the JICA Tsukuba Center. There are many opportunities for them to interact with each other, such as attending intensive lectures at GRIPS together.

However, everyone relating to both training courses feels that we should provide more chances so that trainees of both programs can know each other more. Therefore, ICHARM and IISEE held a joint research presentation on August 26, 2021. Three trainees from each organization were selected to report their research results. It was significant for them to broaden their perspectives on disaster prevention.

Mr. ROSID Abdul from the Indonesia, Seismology Course

Mr. PULIDO IPARRAGUIRRE Gerónimo from Chile, Tsunami Disaster Mitigation Course

Ms. DURAN SARAVIA Susan Ivania from El Salvador, Earthquake Engineering Course
