Table 103-1 - Occupancy Category

Occupancies having surgery and emergency treatment areas, Fire and police stations, Garages and shelters for emergency vehicles and emergency aircraft, Structures and shelters in emergency representers, Aviation control towers, Structures and equipment in communication centers and other facilities required for emergency response, Facilities for standby power-generating equipment for Category I structures, Tanks or other structures containing housing or supporting water or other fire-suppression material or equipment required for the protection of Category I, If or III structures, Public school buildings, Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 300 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power-generating stations, and other public utility facilities not included in Category	OCCUPANCY CATEGORY	OCCUPANCY OR FUNCTION OF STRUCTURE
Garages and shelters for emergency vehicles and emergency aircraft, Structures and shelters in emergency Tepparedness centers, Aviation control towers, Structures and equipment in communication centers and other facilities required for emergency response, Facilities  Facilities  Tanks or other structures containing housing or supporting water or other firesuppression material or equipment required for the protection of Category I, II or III structures, Public school buildings, Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power-generating stations, and other public		
and emergency aircraft,  Structures and shelters in emergency reparedness centers, Aviation control towers,  Structures and equipment in communication centers and other facilities required for emergency response, Facilities for standby power-generating equipment for Category I structures, Tanks or other structures containing housing or supporting water or other fire- suppression material or equipment required for the protection of Category I, II or III structures, Public school buildings, Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power- generating stations, and other public		Fire and police stations,
I Essential Facilities  Facilities for standby power-generating equipment for Category I structures, Tanks or other structures containing housing or supporting water or other fire-suppression material or equipment required for the protection of Category I, II or III structures, Public school buildings, Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power-generating stations, and other public		
Structures and equipment in communication centers and other facilities required for emergency response, Facilities for standby power-generating equipment for Category I structures, Tanks or other structures containing housing or supporting water or other fire-suppression material or equipment required for the protection of Category I, II or III structures, Public school buildings, Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power-generating stations, and other public		_ ·
centers and other facilities required for emergency response, Facilities for standby power-generating equipment for Category I structures, Tanks or other structures containing housing or supporting water or other fire-suppression material or equipment required for the protection of Category I, II or III structures, Public school buildings, Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power-generating stations, and other public		Aviation control towers,
Facilities for standby power-generating equipment for Category I structures,  Tanks or other structures containing housing or supporting water or other fire-suppression material or equipment required for the protection of Category I, II or III structures,  Public school buildings, Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power-generating stations, and other public		centers and other facilities required for
or supporting water or other fire- suppression material or equipment required for the protection of Category I, If or III structures, Public school buildings, Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power- generating stations, and other public		
Hospitals and Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power-generating stations, and other public		or supporting water or other fire- suppression material or equipment required for the protection of Category I,
Designated evacuation centers.  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in power-generating stations, and other public		Public school buildings,
H Hazardous Facilities  Occupancies and structures housing or supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in powergenerating stations, and other public		Hospitals and
supporting toxic or explosive chemicals or substances, Non-building structures storing, supporting or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in powergenerating stations, and other public		Designated evacuation centers.
or containing quantities of toxic or explosive substances.  Single-story school buildings Buildings with an assembly room with an occupant capacity of 1,000 or more, Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students, Buildings used for college or adult education with a capacity of 500 or more students, Institutional buildings with 50 or more incapacitated patients, but not included in Category I, Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained, All structures with an occupancy of 5,000 or more persons, Structures and equipment in powergenerating stations, and other public		supporting toxic or explosive chemicals
Buildings with an assembly room with an occupant capacity of 1,000 or more,  Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students,  Buildings used for college or adult education with a capacity of 500 or more students,  Institutional buildings with 50 or more incapacitated patients, but not included in Category I,  Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained,  All structures with an occupancy of 5,000 or more persons,  Structures and equipment in powergenerating stations, and other public		or containing quantities of toxic or
occupant capacity of 1,000 or more,  Educational buildings such as museums libraries, auditorium with a capacity of 300 or more students,  Buildings used for college or adult education with a capacity of 500 or more students,  Institutional buildings with 50 or more incapacitated patients, but not included in Category I,  Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained,  All structures with an occupancy of 5,000 or more persons,  Structures and equipment in powergenerating stations, and other public	Occupancy	Single-story school buildings
III Special Occupancy Structures  Buildings used for college or adult education with a capacity of 500 or more students,  Institutional buildings with 50 or more incapacitated patients, but not included in Category I,  Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained,  All structures with an occupancy of 5,000 or more persons,  Structures and equipment in powergenerating stations, and other public		Buildings with an assembly room with an occupant capacity of 1,000 or more,
Occupancy Structures  education with a capacity of 500 or more students,  Institutional buildings with 50 or more incapacitated patients, but not included in Category I,  Mental hospitals, sanitariums, jails, prison and other buildings where personal liberties of inmates are similarly restrained,  All structures with an occupancy of 5,000 or more persons,  Structures and equipment in powergenerating stations, and other public		libraries, auditorium with a capacity of
