

Design Provisions for Earthquake Resistance of Structures**ENV 1998-1-1 : 1994****General rules - Seismic actions and general requirements for structures****ENV1998-1-2 : 1994****General rules-General rules for buildings****ENV1998-1-3 : 1995****General rules - Specific rules for various materials and elements****ENV1998-1-4 : 1996****General rules – Strengthening and repair of buildings****ENV1998-2 : 1994****Bridges****ENV1998-3 : 1996****Towers, masts and chimneys****ENV1998—4 : 1998****Silos, tanks and pipelines****ENV1998—5 : : 1994****Foundations, retaining Structures and geotechnical aspects**

Editorial Note: According to the information provided by the Secretariat in 2003, the codes had been under revision works.

“European standards are covered by authors rights, and the CEN member bodies have the right of sale of these standards. Thus, only extracts of Eurocode 8 are herein reproduced.

The complete documents are available for sale from the National Standards Bodies which are members of CEN – European Committee for Standardization”.

There is no available information on the revision of the code at this time. The code printed in 2004 Version of the World List is included in the 2008 Version.
